Managed M365 Data Security

In a landscape where data security is paramount, organizations grapple with limited staff hours for robust security. The absence of data classification hinders zero trust claims and regulatory compliance, echoed by vulnerability reports. KiZAN's answer relieves staff with managed solutions, showcases zero trust progress, and enforces data classification for breach prevention.

Choose Managed M365 Data Security to elevate your data security, compliance, and confidence.

Onboarding Components

Onboard
- ✓ Onboard to AI-driven data classification platform
- ✓ Onboard to KiZAN Managed Services
- ✓ Complete M365 data security risk assessment
