

Secure the future: Four key areas of intelligent security

Identify and repel more threats than ever before with Microsoft Advanced Threat Protection, Azure Security, and Azure Sentinel.

Secure the front door

Protection from identity-driven breaches, email attachments, and attacks targeting the OS

Secure content

Protect content at the time of creation, in transit, and during consumption

Secure devices

Protect against workplace issues or unsecured BYOD devices

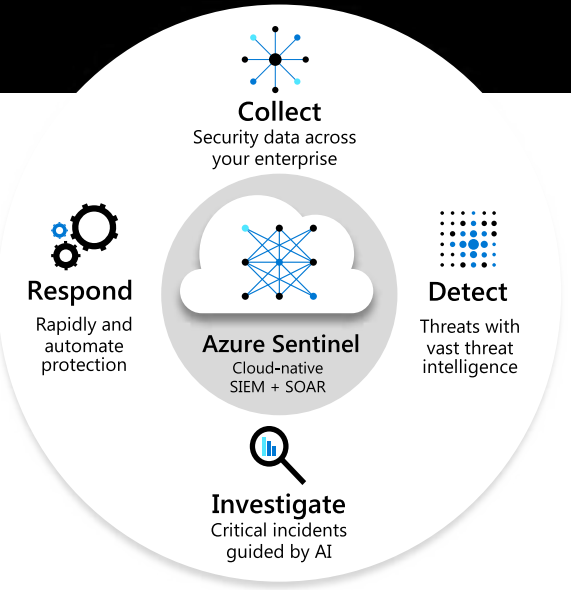

Great employee experience

Maintain strong productivity without compromising security

Azure Sentinel: Standing watch by your side

Intelligent security analytics for your entire enterprise.

"With Microsoft Azure Sentinel, we can better address the main SIEM landscape challenges for our clients, along with simplifying data residency and GDPR concerns."

Andrew Winkelmann
Global Security Consulting
Practice Lead, Accenture

"Azure Sentinel provides a proactive and responsive cloud-native SIEM that will help customers simplify their security operations and scale as they grow."

Richard Diver
Cloud Security Architect, Cloud and Data
Center Transformation, Insight Enterprises, Inc.
