Zero Trust Foundation

Accelerate the deployment of the Microsoft Zero Trust Foundation solutions for your M365 tenant to ensure secure access to your cloud investments.

KiZAN will assist your organization with deployment of the Microsoft Zero Trust Foundation for your M365 tenant.

This solution will help ensure you have the appropriate controls in place to protect your users and devices when accessing the M365 cloud.

Azure AD and Conditional Access are at the heart of the Microsoft Zero Trust User Access model. When enhanced by Intune (Device/App Compliance policies), you can apply the right access controls to keep your organization secure while reducing unnecessary hurdles for your users.

The pillars of Microsoft Zero Trust Foundation (Identity and Device) are:

Zero Trust Principles

Verify explicitly	Use least privileged access	Assume breach
Zero Trust Foundation Deliverables:

▶ Complete Zero Trust Foundation Workshop and planning session

▶ Complete Zero Trust Foundation pre-requisite configurations
- Azure AD Connect with Seamless SSO and Hybrid Azure AD Join
- Azure App Proxy
- MFA and SSPR with AD password Protection
- Intune tenant for Mobile Device, Application, and Windows device management

▶ Pilot deployments for 75 users/devices for Azure AD and Intune workloads
